

Telephone Interpretation

Looking for an interpreter that can help you **anytime** and in just about any language? Our interpreters are available 24/7 and can fit in the palm of your hand. We can interpret for you in virtually every field in over 180 languages.

Faster deployment time

Since the linguist does not have to travel to your location, a telephonic interpretation can be set-up in a matter of seconds and the parties could get to work almost instantly.

Guarantee of Availability

There might be times when securing a linguist at a certain location could be difficult or impossible. Telephonic interpretation does not have the very limiting constraints of having an interpreter at your location at a certain time. Also, since geographical concerns do not apply to telephonic interpretation we can be more selective with our pool of linguists. We can offer you and your clients the best quality of interpretation available, anytime and anywhere.

Cost Advantage

Contrary to on-site interpretation the minimum charge for telephonic interpretation can be a fraction of the cost of a live interpreter. There are no additional charges such as travel time to worry about either. Contact one of our Project Managers and get set up today!
